

Sénégal 2050 Project

S

Digital

The **Digital Master Plan** is a set of priority projects in the National Transformation Agenda, aimed at accelerating the digital transition to support the country's economic and social development. It is based on the modernization of technological infrastructures, the digitalization of public services, and the strengthening of digital skills .

By promoting increased connectivity, innovation and transparency, this plan plays a crucial role in improving administrative efficiency and competitiveness on the international scene. Digitalization is thus an essential catalyst for Senegal's systemic transformation.
