

## Wheat Project

<b>Intervention Zone</b>	Dakar, Thiès, Louga, Saint-Louis, Matam, Tambacounda, Kédougou, Kolda, Sédhiou, Ziguinchor in 34 departments
<b>Description of the Project</b>	<p>In 2023, Senegal imported a volume of wheat of 893,438 tons, representing a foreign exchange outflow of 187 billion FCFA. The importation of wheat is exclusively due to millers who transform it into flour, before putting it on the market. This project therefore aims to reduce dependence on wheat imports. The following approach has been adopted:</p> <ul style="list-style-type: none"> <li>popularize the most suitable varieties with the highest yields and define efficient technical routes for the development of cultivation in agro-ecological zones</li> <li>Develop the transfer of technologies and training of producers in wheat growing techniques</li> <li>develop initiatives to connect producers and manufacturers for secure contracts.</li> <li>Initiate tax incentive measures favorable to contractualization between industrialists and wheat producers</li> </ul>
<b>Expected impact</b>	<ul style="list-style-type: none"> <li>reduction of wheat imports</li> <li>Supervision and professionalization of wheat producer organizations</li> <li>easier access to finance for producers and processors</li> </ul>
