

Provision of infrastructure and resources for the digital ecosystem (Datacenter, Supercomputer, development environment, etc.)

Intervention Zone	Dakar
Description of the Project	Aims to equip the country with advanced technological infrastructure to support digital transformation. This includes the creation of data centers to host and secure data, the installation of supercomputers for high-performance data processing, as well as the establishment of a development environment to support digital innovation and the creation of local solutions. This project will promote Senegal's competitiveness in the technological field, support research and innovation, and stimulate economic and social development through the use of digital technologies.
Expected impact	<ul style="list-style-type: none"> ✓ Promote the emergence of local and national champions and the export of digital products and services ✓ Establishing skills locally to combat rural exodus ✓ Capture a significant share of the local, national and regional market ✓ Developing the digital industry ✓ Create thousands of jobs in the territorial hubs
