

Supporting the administration for energy efficiency and reducing the carbon footprint (smart building, etc.)

Intervention Zone

DAKAR

Description of the Project

This project aims to support the public administration in the energy transition by implementing innovative strategies and solutions to reduce energy consumption and the carbon footprint of administrative infrastructures. The objective is to contribute to sustainable development while optimizing energy costs and improving environmental performance.

Expected impact

- State energy bill to drop
- Development of the energy mix in state consumption
- Reducing the carbon footprint of the administration
- Automation of energy management processes
- Rise of a digital industry specializing in IOT
