

Urban Renewal and Development of Development Poles

Intervention Zone

- Mbacké (578 hectares between the villages of Kael , Taiba, Ngabou, Darou Nahim)
- Tambacounda (428 hectares in the village of Botou near Tamba after the Botou Classified Forest)
- HLM markets, Keur Massar, Thiès, Mbour, Sor Saint-Louis, Ocass de Touba

Description of the Project

This project aims to revitalize development hubs in Senegal, focusing on several key objectives, including sustainable development, social cohesion, adaptation to climate change, and infrastructure modernization. The project is divided into several components: the development of the Tambacounda hub, which includes the development of road infrastructure such as the Boundou loop highway , as well as the rehabilitation of roads to the Tamba dry port. Among the planned facilities are a level 1 hospital, a mining science institute, and a hotel reception, as well as a local investment platform.

The Mbacké hub will also be improved, with infrastructure aimed at strengthening sanitation networks and improving interurban roads. Facilities such as a Special Economic Zone, a central market in Mbacké, and a hotel reception will accompany these efforts to promote local economic development.

This 6-year project aims to create sustainable and interconnected development hubs, contributing to inclusive and resilient economic growth.

Expected

- Improved living conditions with reduced inequality
- Establishment of viable and integrated economic zones

Project Leader

Entity

- Capacity building of territories and populations
