

## Municipal Waste Recovery Project and Intercommunal Industrial Composting Units

<b>Intervention Zone</b>	Niayes, River, Peanut Basin, Forest-Pastoral Zone and Casamance
<b>Description of the Project</b>	<p>To reduce the bill for the acquisition of fertilizers by the State, estimated at around 50 billion FCFA, composting represents a potential solution for both waste management and soil fertilization.</p> <p>The regions of Dakar, Kaolack, Ziguinchor, Louga, Matam are targeted for the recovery of municipal and communal waste including waste from animal slaughtering infrastructures taking into account the availability of biomass and the integration of agriculture and livestock. Thus two (02) municipal industrial units will be built in Dakar (01) and Kaolack (01) and five (05) intercommunal units. The choice and validation of the sites will be done following a participatory and inclusive approach.</p> <p>The completion of this project will help reduce the costs of fertilizer imports and develop organizational dynamics around integrated soil health management.</p>
<b>Expected</b>	<ul style="list-style-type: none"> <li>Strengthening soil health</li> <li>Improving food safety</li> </ul>
