

Development project for 1000 ha of valleys and lowlands and 40 ha of market garden areas in the Fatick and Kaolack regions

Intervention Zone

Kaolack and Fatick

Description of the Project

The overall objective of this project is to improve food security and resilience to climate change for the most vulnerable populations in rural and peri-urban areas. It specifically aims to strengthen the productive base, in particular water management and the strengthening of the technical and organizational capacities of producers. This will involve building 30 km of production tracks, developing 1,000 ha within the framework of large agricultural perimeters, developing 40 ha of modern private agricultural farms and 3 fish ponds. The project has 5 components:

1. Intensification and diversification of water control techniques;
2. Valorization of developed areas through the intensification and diversification of agricultural production and through the strengthening of value chains;
3. Improving food security for beneficiary populations;
4. Improving governance of the agricultural and rural sector
5. Support for the technical and administrative coordination of

Project Leader

Expected Entity Impact

- Sustainably increase income and production
- Increase agricultural production
- Ministry of Agriculture, Food Sovereignty and Livestock
- Improving household diets and nutrition
