

AEROVILLE

**Intervention
Zone**

DIASS AIBD

**Description
of the
Project**

The project consists of the reconfiguration and extension of the development of the airport's terminal infrastructure in order to improve the customer experience and support the expected growth in air traffic (post-crisis); as well as Air Senegal's development plan. The general objective of this project is to reconfigure the layout of the airport terminal infrastructure in order to improve the passenger experience and support the expected growth in air traffic (post-covid-19 crisis) as well as Air Senegal's development plan (opening of new lines). The aim is to increase passenger capacity.

**Expected
impact**

- Be able to support Air Senegal's development plan (5 million passengers in 2025 with 300k connecting passengers)
- accommodate 10 million passengers in 2035, 30% of whom will be connecting
- Increased capacity for processing correspondences and transits
