

Storage Sheds

Intervention Zone

Production areas (Niayes area, Sine Saloum, River Valley, South and South-East)
Proximity to major markets (Saint Louis, Dakar, Thiès, Mbour, Touba, Kaolack, Ziguinchor, etc.).

Description of the Project

The project aims to significantly reduce post-harvest losses of fruits and vegetables, which represent a major challenge for farmers and local markets, especially during peak production periods. By constructing 100 modern storage warehouses, each with a capacity of 2,000 tonnes, the project aims to create essential infrastructure for the efficient storage of 200,000 tonnes of fruits and vegetables per year.

This initiative will not only increase the availability of fresh produce in markets, but also stabilize prices in times of surplus. By reducing post-harvest losses, farmers will benefit from greater profitability, which will encourage agricultural production and promote investment in the sector. In parallel, the project will encourage the adoption of optimal storage practices, ensuring the quality of products and facilitating their distribution.

Expected

- Reduction of post-harvest losses of fruits and vegetables
