

Extension and strengthening of the national backbone and coverage of the territory by a fiber optic network

Intervention Zone

The whole territory

Description of the Project

The project to **extend and strengthen the national backbone and network the territory with a fiber optic network** aims to develop a high-speed telecommunications infrastructure across the entire national territory. It consists of extending the fiber optic network to improve connectivity, reduce the digital divide and strengthen access to digital services in urban and rural areas. This strategic project supports economic development, facilitates digital exchanges and contributes to social inclusion by ensuring reliable and fast access to the Internet for citizens, businesses and public administrations.

Expected impact

- Consolidated, stable and efficient government intranet network
- Reinforced decentralized structures
- Accessibility of services hosted in the different data centers .
- Improving the reliability of existing infrastructure and strengthening the government intranet network
- Integration of sites into the government intranet;
- Rehabilitation of local networks of interconnected sites
- coverage of the territory by a high-quality and resilient fiber optic network
- pooling and interconnection of telecom operators,
- Last mile coverage for an optimal network (Last mile)
