

Intelligent Traffic Management System in Dakar (ITS)

Intervention
Zone

DAKAR

Description
of the Project

The **Intelligent Traffic Management System in Dakar (ITS)** is an initiative aimed at modernizing and optimizing road traffic in the Senegalese capital. This project is part of the efforts of the Executive Council of Urban Transport of Dakar (CETUD) to improve urban mobility and reduce negative externalities related to transport.

This project is also part of a dynamic of urban and infrastructure transformation, contributing to an inclusive and decarbonized economy, while meeting the objectives of transition towards clean and intelligent mobility.

Expected impact

- Reducing the weight of the informal sector in the economy
- Broaden the tax base and increase state revenues
- Facilitate the identification and location of businesses
- Integrating the informal sector into digital transformation
- Promoting transparency and efficiency in business financing
- Decrease in tax evasion and fraud
- Greater visibility and control of the national economy
- Expansion of the national digital market (new clientele)
