

Project for the construction of branch A of the Delta emissary

Intervention Zone

Regions of Saint Louis, Department of Saint-Louis and Dagana

Description of the Project

The project will target the following interventions:

- The collection of drainage water from the CSS, from the perimeters polarized by the Ndiael station (Grande Digue Tellel, Kassack Nord, Kassack Sud, etc.), the Noar station (Ndiaye Mberes, Pont Gendarme, Thilène, Ndiagambal), those of the Diawel area of Packh, Colonat and some located north of Lake Guiers (Ndombo -Thiago, CSS, Mbagam);
- the remediation of more than 43,000 hectares of agricultural land to ensure their long-term productivity.

The objective is to perpetuate the productivity of the delta's soils, preserve the environment and protect Lake Guiers, the main source of drinking water for the city of Dakar.

Expected impact

- Sanitation of more than 43,000 ha of agricultural land
- Sustainable preservation of Lake Guiers against chemical pollutants from agricultural expansion
