

## Define and implement a Government Enterprise Architecture (GEA)

### Intervention Zone

The whole territory

### Description of the Project

It consists of structuring and optimizing the State's information systems to improve the efficiency, transparency and coherence of public services. The AEG will define a common architecture for processes, technologies and data within the different administrations, thus facilitating interoperability and centralized management of government information. This project will contribute to the modernization of public administration, the reduction of operational costs and the improvement of the quality of services provided to citizens.

### Expected impact

- ✓ Infrastructure security and data protection
- ✓ Facilitating access to digital services for users
- ✓ Availability of a coherent strategy for the development and integration of all sectoral information systems

## Project Leader

**Entity** Ministry of Communication, Telecommunications and Digital Affairs

**Contact** N / A

**Project Partner(s)** MCTN / SENUM / AIIA

## Funding

**Project amount** **FCFA 30,000,000,000** **USD 47,653,260**

**Project duration** 36 to 48 MONTHS

**Type of Financing Sought** ✓ Private ✓ Audience PPP

## Progress Status

**Actions initiated**

**Documents available**
