

Industrial Tomato Sector Recovery Program

Intervention Zone	Saint-Louis (Saint-Louis, Dagana and Podor) Louga (Keur Momar Sarr).
Description of the Project	<p>The industrial tomato is one of the main horticultural crops in the Senegal River Valley (SV). Senegal currently needs 25,000 tons of double tomato concentrate to satisfy its national consumption. This requires approximately 150,000 tons of fresh tomatoes while the current average production is 70,000 tonnes. This will involve proposing a strategy for reviving industrial tomatoes for the period 2024-2029 in line with Senegal's Strategic Plan for Food Sovereignty, in order to make Senegal the hub of triple concentrate in West Africa, meet domestic demand and stop the importation of concentrates through</p> <ul style="list-style-type: none"> • increasing local production • development of adequate infrastructure, • the promotion of public-private partnerships & private investments • strengthening the governance of the sector
Expected impact	<ul style="list-style-type: none"> ▪ Positioning Senegal as the hub of triple concentrate ▪ Improving productivity and production of fresh tomatoes
