

Implementation of a National Sovereign Cloud

Intervention Zone

Dakar

Description of the Project

Consists of creating a national infrastructure for data storage and management, fully secured and locally controlled. This sovereign cloud will host the strategic data of administrations, businesses and citizens, while guaranteeing their confidentiality, availability and integrity. It will promote digital independence, strengthen the security of information systems, and support the country's digital transformation by offering reliable services aligned with international standards.

Expected impact

- ✓ Streamlining and securing critical digital infrastructures
- ✓ The centralization of basic services (Messaging, Directory, Collaboration, communication, etc.) and critical infrastructures of the country.
- ✓ Adapted and efficient cloud services (IaaS - Infrastructure as a Service, PaaS - Platform as a Service, SaaS - Software as a Service) for all administrative structures
