

Creation of a digital manufacturing industry (assembly, production of electronic components and equipment)

Intervention Zone

Dakar

Description of the Project

It consists of developing a local sector for the production and assembly of electronic components and equipment, such as computers, smartphones, and other digital devices. The objective is to reduce dependence on imports, stimulate the local economy, and create jobs in the technology and industry sectors. This project will also promote the development of skills in electronic production professions, while contributing to the country's technological sovereignty and the development of a sustainable digital ecosystem.

Expected impact

- ✓ Creation of thousands of quality jobs
- ✓ Positioning Senegal as a sub-regional digital hub
- ✓ Boosting digital and electronic sovereignty
- ✓ Balance of trade equilibrium
- ✓ Increase in digital GDP
