| Description<br>of the<br>Project                                                                                                                                                                       | This project aims to transform the agricultural landscape of Gouloumbou by contributing to improving food security and economic development in the territories. In addition to strengthening the resilience of communities to food challenges, it aims to create sustainable jobs, stimulate the local economy and promote innovation in agricultural practices. By promoting the emergence of a culture of agricultural entrepreneurship, it will strengthen the links between producers and markets, and improve the quality of life of local populations. The main objective is to increase productivity and rice production through the development of sustainable production systems.  In addition, the project focuses on promoting the value chain and agribusiness, with a view to developing and diversifying sources of growth, thus generating financial resources for the State. It also seeks to professionalize and empower producers while encouraging and supporting private initiatives, while strengthening producers' management capacities. |
| Expected impact  Significant improvement in food security and a sustainable increase in producers' income, thus contributing to the economic development of the Gouloumbo territories.  Project Leader |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
